## Hoot Mon, We're Awa'!

**Twenty-Four Rinks Entered For Bonspiel Opening Monday, Late Entries Expected to Bring Total to 34 or 36 Rinks.**

**Local Club Have All Arrangements Completed, so That Everything Will Run Smoothly, Even The Rocks.**

The fifteenth annual Bonspiel of the Crow's Nest Curling Association opens next Monday at Coleman, and from present indications a splendid representation from all clubs within the Association will be on hand to do battle for the honor of the game and the splendid cups and prizes offered in the various events.

The members of the local club have been working hard during the past few weeks getting everything ready for this "event of the season" in the life of every curler. Changes have been made in the lunch room to provide ample seating accommodation; special provision has been made to facilitate handling of rocks between the curling and skating rinks; the ice committee are all ready to make the extra five sheets of "good and true" ice in the arena and splendid ice is promised on all of the nine sheets contained under one roof.

The ladies have completed arrangements for catering to the requirements of the "inner man," while the entertainment committee, who are looking after the annual banquet to be held Wednesday evening, have decided to make of food, song and story that will equal, if not surpass, anything of this nature ever provided at an occasion of this kind.

## Balto's Race to Nome

Coming to The Palace

The Palace Theatre have booked one of the most spectacular pictures ever filmed depicting Balto's race to Nome at the time of the diphtheria epidemic in the Yukon last winter. Gunner Kassar is the man who made this historic trip by dog team carrying the precious anti-toxin to the suffering people. Every incident of this race with death over hundreds of miles of snowy waste land in the depth of winter has been filmed and is to be released shortly. Watch The Journal for further announcements.

## Southern Motor Highway

Still Open For Traffic

The "All Red Route," a motor highway on which Coleman is situated, is due to have its name changed to the "All The Year Round Route," if the present epidemic weather continues a couple of months longer. This highway was opened for traffic last April and has been used by thousands of tourists every month since that time. Last week, January 3rd to 9th, four autos passed through Coleman, two going west to California and two east coming from Seattle, Washington, and they all report splendid road and weather conditions throughout their long trip. What is remembered that the renowned Band-Windermere highway was closed to traffic several months ago on account of heavy snow. It is all the more reason why the "All Red Route" should be kept open. The "All The Year Round Route."

## Coleman Branch Womens Auxiliary Hold Annual Meeting, Elect Officers.

The annual meeting of the Ladies Guild of St. Alban's church was held in the Parish Hall, last month. The reading of the reports showed a good year with a creditable balance on hand.

The organization is now affiliated with the Calgary Diocesan branch of the Women's Auxiliary, and the officers for 1926 are as follows:

President—Mrs. F. Harrington.  
1st Vice President—Mrs. A. S. Cornish.  
2nd Vice President—Mrs. J. Derbyshire.  
Secretary—Mrs. G. A. Brown.

Executive—Mrs. J. S. Rogers, Mrs. W. White, Mrs. W. Bosworth.

## HOCKEY PICTORIAL

Second Edition

The second edition of the Hockey Pictorial is on the market, more complete and up-to-date than the original edition, which was received with such acclaim by followers of the great winter sport. Most favorable comments have been passed upon the publication by sports writers the continent over, and the general opinion as expressed by players and scribblers is that no more comprehensive or handsome book in the sporting line was ever printed. A feature that should possess a marked appeal not only to puck chasers of the present, but to old timers, are the many group pictures of champion teams, dating back to the early history of hockey. This new edition not only contains the history of hockey in Canada, but covers the history of the game in the United States as well, with handsome engravings of Canadian and American teams, and is right up to the minute in every respect. Any further information pertaining to the book can be obtained by writing to George King, Publisher, 84 Victoria St., Toronto, Ont.

## Fear

By Dr. C.M. Hinks, Medical Director, Canadian National Committee for Mental Hygiene.

The bogie man, the goblin and the ghost, invented to frighten children into behaving, often mark the disposition of a child. They tend to cause timidity and have other unfortunate consequences. Parents should refrain from telling ghost stories that only serve to arouse dread in the mind of a child. They should teach their children that sleeping in a dark room is the most natural thing in the world, and that dark corners hold no terrors. For the average child, the parental example of courage and fearlessness in meeting all situations will prevent timidity and cowardice in later years. It is always important to interpret the fears of children correctly and to meet them in a rational way. In the case of a child afflicted with intense and persistent fears, a physician should be consulted. Children who suffer from "night terrors" often have physical infirmities and, with their removal, the fears disappear. In some cases "night terrors" are caused by heavy meals or by excitement just before bed time.

## Say It With Flowers

When you require flowers artistically arranged for any occasion, at moderate prices, and of unequalled quality, phone No. 18, THE COLEMAN TRADING CO., LTD., agents, for Franche Bros., Lethbridge.

## Knights and Sisters Hold Joint Installation, Followed by Supper and Dance.

Sentinel Lodge No. 25, Knights of Pythias and Progressive Temple No. 3, Pythian Sisters, held a joint installation of officers in Castle Hall on Thursday, January 7th. A large turnout of members, and visitors from Blairmore, contributed to make the evening a most enjoyable one. Upon the conclusion of the ceremonies supper was served after which dancing held sway until the wee small hours of the morning.

The installing officers for the Knights was Bro J. R. Wood, Grand Chancellor, and for the Sisters, Mrs. D. Gillespie, P.C.

## Fall Term Exams.

Coleman High School

### Compositions I

Angus Cameron 82, Hugh Dunlop 81, Gladys Higginbotham 80, Joe Janosak 80, Helen Churka 78, Marjorie Groat 77, Alice Sapeta 73, Raymond Stillers 73, Grace MacKinnon 72, Ida Thom 71, Mary Pitsney 71, Jean Patterson 71, Idris Haydon 70, James Kilgannon 70, Anna Hall 69, Violet Davies 68, Annie Kilbott 67, Ella Cella 68, Sadie Woods 65, Tony Nicholas 65, Audrey Ash 64, May Armstrong 61, Gladys Neilson 67, Marion Burrell 66, Francis Armstrong 66, Megan Jones 65, Edward Wood 65, Mary Hyslop 64. Class average 65.2 %

### Literature II

Class average 75.1 %

Chas. Nicholas' \$35,000 unloading sale which opened on Saturday morning last, drew a crowd of buyers on the opening day and a large volume of business was transacted, and each of the following days this week many purchasers have thronged the store participating in the splendid bargains being offered. Naturally Mr. Nicholas is well pleased with the response made by the people of Coleman to his big sale which continues for 15 days.

## LOCAL, PERSONAL AND GENERAL NEWS

Mr. O. E. S. Whiteside returned Wednesday from Calgary where he spent a few days on business.

Mr. P. Donnelly, of the local Bank of Commerce staff, left Sunday for Lethbridge, where he is doing relief work.

"The Iron Horse" shown at the Palace Saturday and Monday, drew good houses and was much enjoyed. Many of its features resembled that other big production, "The Covered Wagon."

Mr. and Mrs. Luke Lindoe entertained a number of friends at their home, Park Terrace, on Tuesday evening.

The Coleman Tigers secured a notable win on Tuesday night when they defeated the Bulldogs at Reliance in a Crow hockey fixture by a score of 6-2. Blairmore and Lethbridge did not play in Lethbridge Tuesday owing to mild weather spoiling the ice at Lethbridge.

Quite a number of merchants in town have been busily engaged in stock-taking during the past couple of weeks. This annual event is about as pleasant as spending a summer vacation in the Sahara Desert.

The S. Moore rink entered the finals of the Morris Cup on Tuesday night when they defeated H. Bonfils' side 12-6. The finals in this competition will likely take place tonight or Friday.

The H. E. Gale sale got away to a splendid start on Tuesday morning of this week. Bargain hunters were at the store early on the opening morning and a steady stream thronged the store all day Tuesday, and found many real bargains offering. Wednesday and today finds the sale still going strong and well patronized by Coleman and out of town people.

A number of ladies—wives of curlers—met in the Curling Club rooms on Monday evening for the purpose of making arrangements to supervise the serving of refreshments at the Bonspiel, which commences on Monday of next week. The ladies have taken hold of the matter in a business-like way and The Journal predicts that the service rendered by these ladies in the lunch room will be par excellence.

Mr. H. R. Christopher of Calgary, representing Brown & Bigelow, was a business visitor to Coleman on Tuesday.

The two front rows of seats on both sides of the centre portion of the Arena may be reserved by fans at hockey games.

The Trail Rangers played their first league game of hockey on Saturday. They traveled to Blairmore and on a sandy sheet of ice had a great game. Willie Fraser, Rola Patterson and David McLeod easily played great hockey. This little fellow has fine combination. Graham Allan has fun, made some splendid saves. The Blairmore boys were heavier than our little chaps, and put up a fast brand of skating. Blairmore got the first goal in the first period. In the second, Willie Fraser put in an impossible one and equalized the score. The boys battled to the end and then played five minutes each way and could not break the tie. Coleman gained a point in the league.

## Alberta Has Mild Weather

Extremely mild weather has prevailed in Alberta during the past two months. The weather records for the months of December and November show that the average maximum temperature for November was 32.8 and the average minimum was 15.4, while the average maximum for December was 26.6 and the average minimum was 14. On only three days in November did the thermometer register below zero and on two days in December. Calgary records show even higher average temperatures in both Edmonton and Calgary the mercury having risen above 50 on several days in each month. In the far north, particularly in the Peace River district, the weather has been very mild, with the rivers running open, and stock wintering out. In Lethbridge district in the south, almost summer weather has prevailed.

## Tax Collections Heavy

Indications of returning prosperity to Alberta were never stronger than given in the returns of tax collections of the department of municipal affairs for the year. The total collected for 1925 has been \$3,188,078.82 compared with \$2,887,852.95 for 1924. Since the 1925 collections at the end of November were still short of those of 1924 for the same period by \$100,000 the collections during December were consequently very heavy, the total collected during that month being \$1,510,084.36. The highest record day brought in \$252,088.69 which was over \$100,000 heavier than the heaviest day in any previous year. On December 14, there were 632 individual payments, each involving several entries.

## Tone and Thought

When we speak of tone we have several points of view to consider. We have tone in light, colour, photography and music.

This article will deal with the last subject, that of music; and in this connection tone will be considered as sound, or the character of sound reduced to a small number of feelings, the chief of which are Quality and Quantity. Quantity as far as music is concerned, would vary from the very soft whisper of a violin to the very loud p p p to the roar of a drum or the full force of a full orchestra in a tutti passage marked f f f f.

Quality is more of an individual than a collective question. We speak of one particular violinist, as producing a hard and unmelancholic quality of tone, whilst another is the lucky possessor of a tone of quality of rich coloring, sound, smooth, and full; though the two other attributes should be classified according to the relative of Quantity. The foregoing is, however, a mere introduction to the subject of this article—the influence of thought on tone, whether quality or quantity.

"As a man thinks in his heart, so is he," is a well known truth. This might be translated musically into the following: The total quality and quantity of our musical performance will be the outward and practical result or translation of our conscious and sub-conscious thoughts.

**"is good tea" TEA**

And because you like good things you'll like Red Rose.

### Trade and War

The League of Nations is about to conduct an exhaustive inquiry into the subject of industry and commerce as they affect war. It is about time such an international probe be undertaken because there is a growing belief among the masses of people in all countries that many of the wars of the past have been brought about by industrial interests or by groups set on conquest, not for broad national interests, but for selfish trade reasons and benefits.

It is to be earnestly hoped that the proposed inquiry will include a study of the effect which protective tariff have not only on trade itself, but upon patriotic aspirations and feelings of the people of one country towards another. That is to say, the effect of the action of one country in imposing a high tariff wall against the products of another upon the maintenance of friendly feelings between the two countries. We venture the opinion that if all international trade was free and unrestricted by any man-made artificial barriers, there would be fewer prejudices, suspicions, and jealousies, leading to ill-feelings and in some cases war between nations.

No two national groups in the world are closer together in thought, sentiment and ideals than the United States and the British Commonwealth of Nations. They have lived in peace with each other for over one hundred years, and where United States and British territory join not a fort exists upon a gun is mounted. Yet ever and anon friction arises and in nearly every instance some petty industrial or commercial question is at issue.

For example, at the present time a great hardship is being landed in the United States because of the high price of raw rubber, the chief raw material of the world's supply is raised within the British Empire. On the other hand, the United States consumes about the same quantity. During the war, the price of crude rubber ranged about fifty cents a pound. Following the war, the price dropped to around seven cents, which was below profitable production. To remedy this condition a special type of export tax was devised to reduce production. It was so arranged as to discourage production during periods of high prices, the idea being to create a fair and normal situation. The measure went into effect in 1922 and last year the effects began to be felt, rubber rising in price to around \$100 a pound.

The big United States automobile manufacturers and other large users of rubber are bitterly complaining and charge the British with an unfair load of policy. Some very severe things are being said against the British by the United States Government and Congress are taking official cognizance of the situation. Not only so, but the direct result has been made as to United States action should Canada, in its own national interests, find it necessary to impose an export duty on pulpwood and pulp. All kinds of retaliatory measures are threatened.

The United States constitution prohibits the imposition of export taxes, but the United States has for years maintained the highest protective tariff on imports known to the world, a tariff which amounts in many cases to an actual prohibition of imports. Canada and Great Britain are the chief sufferers from these protective tariffs. They operate to keep the United States market—our nearest and most important—closed and shut. The Canadians do not like it, nor do we, but it is very clearly they are not complaining, but are going about their own business of developing other markets.

During the war, Great Britain borrowed billions of dollars from the United States, but it expended every dollar in the purchase of goods in that country, paying without protest the very high prices demanded in the States. Thus the United States became immediately prosperous and wealthy while Britain was impoverished. And Britain was obliged to do this, not for herself alone, but to sustain France and her other allies. But Britain did not complain.

The absurdity and inconsistency of the United States position is seen, however, in that, while denouncing the British action in regard to crude rubber, proposals are now before the United States Government and Congress to adopt exactly the same principle in order to raise United States production out of the doldrums. About 15 per cent of United States farm products are sold abroad. That is the surplus of production over domestic consumption. To sell the entire crop, prices have to go down to the foreign level, and this level is frequently below the cost of production. Hence the farmers have suffered.

As long as foreign prices remain below United States cost of production, the only way farming there can be made profitable is to sell no produce. British brought about the cost of crude rubber. Unless some similar action be taken to curtail farm production in the United States, the result is farming to continue unprofitable. It is proposed, therefore, that the United States should fix prices, but if the Government should do this, without the safeguards of the British plan, and thus make farming profitable, there would be increased, rather than decreased, production, and the problem of the surplus would become worse and worse.

Man made a fatal blunder when he undertook to interfere with the economic law of supply and demand and sought to restrict and regulate international trade by the expedients of tariff walls. It has resulted in trouble and disaffection at home, and international ill-will abroad. Perhaps the League of Nations inquiry will result in some helpful suggestions, even though a complete solution may not be possible.

The private aquarium of the Duke of Bedford harbors a European catfish which, thought more than 50 years old, shows no signs of weariness.

### Will Erect New Fish Cannery

It is understood that the British Columbia Packers will erect a new cannery at Silladago, in the Queen Charlotte Islands.

### May Find Cure For Paralysis

Chicago Doctor Says Spine May Be Patched

Probability that a cure for paralysis may be found was seen in experiments described by Dr. R. W. Gerard, University of Chicago, at the closing session of the convention of the Federation of American Societies for Experimental Biology at Cleveland, Ohio. Incurable paralysis invariably develops in humans after the spinal cord has been severed, Dr. Gerard said.

He has hopes that a human spinal cord may be mended, possibly by patches.

### "DIAMOND DYE" ANY

GARMENT, DRAPERY

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions for simple any woman can tint soft, delicate shades of dye rich, permanent colors in linens, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything.

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

### Poor Law Reform

Plan to Abolish Board of Guardians in Britain

Abolition of the boards of guardians, whose principal functions are recognized with poor law relief, and transfer of their powers to county and county borough councils, is proposed in a scheme drawn up by the British ministry of health. The proposals form part of the policy of poor law reform and coordination of all forms of public assistance. Transference of the duties of the metropolitan areas, board to the London county council is also proposed. The scheme is also proposed to the county council is also proposed.

### TO THE MOTHERS OF ALL PALE PILES

If Your Daughter Shows Signs of Anemia a Tonic is Needed

Anemia is simply a lack of blood. It is one of the most common and the most dangerous of ailments from which growing girls suffer. It is common because the blood is often impoverished through overwork and overstudy. It is dangerous because of the anemization of the blood, the body is unable to resist disease, and the tendency to grow steadily worse. Every girl who is anemic should take a tonic to ward off this insidious trouble. It is because of their power, that Dr. Williams' Pink Pills have made a world-wide reputation. The case of Miss Gladys Crook, Atlanta, amply proves the value of this medicine. Miss Crook says: "During my school days I suffered a great deal from this weakness and I was continually weak and tired; my appetite failed, my sleep unrefreshing and I was troubled with backaches. To make matters worse I was a nervous, nervous appendicitis and the operation left me in a very weakened state. My mother, hearing of the value of Dr. Williams' Pink Pills, had me take them and after using them for some time I can say the result was simply wonderful, as they completely restored my health, and have when opportunity offered, been given to my daughter. You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Sugar Beets in Manitoba

Brandon District Will Have Test of Pilets Set Out This Year

Tests conducted at the Manitoba Agricultural College and at the plant of the American Beet Sugar Company, at Grand Forks, N.D., of the sugar beets grown in the vicinity of Brandon in 1925, have shown favorable results. A larger programme in testing will be carried out in 1926 by the Brandon board of trade in conjunction with the horticultural society and from fifty to one hundred plants will be set out throughout the district.

### Says Leprosy Can Be Cured

Nearly half the cases of leprosy which have not passed the six-month stage can be cured by the use of chaulmoigric oil, according to Dr. Roger Adams, of the University of Illinois.

"How's crops, Sir?"

"Apples is small this year, with worm holes bigger'n your fist in 'em."

### Helps Children Grow

SCOTT'S EMULSION  
RICH IN COD-LIVER OIL AND  
HEALTH-GIVING VITAMINS

### Past Year Prosperous

For Canadian National

Freight and Passenger Traffic Have Both Shown Increase

Having witnessed the transition from a period of operating deficits to one where the lines in the western region have earned operating profit for the company, the calendar year 1925 will go down to history as a successful one for the Canadian National Railways in Western Canada, declared Mr. W. A. Kingsland, general manager of western lines. In an interview at Winnipeg, freight and passenger traffic, express and telegraph business alike have shown increases, and operating costs have been reduced by careful paring until the annual figures, which will be issued from system headquarters in Montreal shortly, will show an operating profit for the line contained in the western region, which stretches from Armstrong, Ont., at the head of the lakes, to the Pacific coast.

While a large part of the increase over 1924 business is due to the increased yield of grain in the prairie provinces, there have also been increases in other commodities handled by Canadian National as well as great increase in the passenger traffic over the western lines. Indications at the present time are that still better times are ahead in 1926, as all signs point to continued improvement in business in the west and to a greatly increased income during the coming year. Plans for the coming year are being worked out, and the prospective increased business are continually before the Canadian National Railways executive and continual thought is given to methods whereby any improvement in the transportation service to the public can be made.

### Powerful Medicine

The healing properties in six essential oils of Dr. Thomas' Electric Oil, forming one of the most beneficial balms ever offered to the use of man. Many can testify as to its power in relieving pain, and many more can testify that they have been cured by its use. The power is not expressed by the small price at which it sells.

### Trade With South Africa

Canada Supplies Ninety Per Cent of Newspaper Trade For That Country

Prospects for additional trade between Canada and South Africa are promising in the opinion of Erik M. Eken, of the Waynagannak Pulp and Paper Company, who has just returned from South Africa after spending two years studying conditions there. At the present time Canada supplies 90 per cent of the newspaper trade of that country, as well as automobiles, agricultural machinery, wheat, flour, etc.

### She Could Never Do The Things Other Girls Did

Miss L. J. Ross, Scotland, Alta., writes: "I am now twenty years old, but have suffered from heart palpitation and averse trouble for several years."

"I could never do the things other girls did, that is, in the line of sports, skating, etc., and could never depend on myself at work. About six months ago I began taking

### SUNDAY SCHOOL LESSON

JANUARY 17

JESUS AND NICODIMUS

Golden Text: God so loved the world, that He gave His only begotten Son, that whosoever believeth on Him should not perish, but have eternal life. John 3:16.

Lesson: John 3:1-17; 7:45-82; 19:38-42.

Devotional Reading: John 3:31-36.

Explanations and Comments

Nicodemus Comes to Jesus, verses 1, 2.—Nicodemus was a Jew, a member of that sect which is called the Pharisees. He was a Pharisee, a member of the Sanhedrin, the council of seventy men who formed the Jewish Court of Justice. He appears later as a defender of Jesus (Jn. 7:52-53). After the crucifixion he brought Nicodemus and aloes for the embalming of Christ's body. It was at night that Nicodemus made his nocturnal visit to Jesus. He was cautious, and probably did not wish to endanger his reputation by being seen visiting the new rabbi. (We are told later that some even of the Sanhedrin believed in Jesus, but did not dare tell it for fear that they might be put out of the Synagogue, Jn. 12:42.)

"Rabbi," said Nicodemus, "we know that thou art a teacher, come from God; for thou doest, except God be with thee, things which no man can do these things." Nicodemus was convinced that Jesus was a divinely-communited Teacher, that Jesus' teaching was divinely authenticated by his miracles, and he came to hear what Jesus had to teach.

### Will Link Empire With Air Service

Former Air Secretary Predicts This Will Come Early

That nations within the British empire would be closely linked by air transportation systems within the near future was the opinion expressed by Lord Thomson, who was secretary of state for air in the British Labor Government, in an interview at Toronto. Lord Thomson is a firm believer in airplanes particularly.

"I feel sure the time is coming when Canada will be linked by air with this island," he said.

Canada should be an advantageous country for the development of commercial aviation. Lord Thomson thought. With such a vast territory he believed that a commercial system here would be a paying proposition. He also expressed the opinion that Canada could do much in development of a link in the imperial chain.

Lord Thomson is proceeding to England after completing a lecture tour in the United States.

No man or woman should hobble painfully about because of corns when so certain a relief is at hand as Holway's Corn Remover.

### Hope To Reduce Cost Of Paper

May Use Eucalyptus Wood For Newsprint in United States

A source that will give a plentiful supply of newspaper paper at low cost has been found by the forest products laboratory of the University of Wisconsin.

Successful experiments, conducted by the laboratory, have resulted in the production of paper from eucalyptus wood grown in San Paulo, Brazil. A small roll run through the press of a newspaper showed favorable results. The quality and strength for use in high-speed presses, experimenters say. The paper can be produced at about half the cost of the present imported newsprint, the laboratory estimated.

### Sun Spots May Not Affect Weather

Experts at the Toronto Meteorological office doubt very much if the spots on the sun have any effect on the weather.

W. E. Jackson, head assistant, Toronto office, said he was looking at the sun and saw two magnificent groups of sun spots. "You could drop the earth into the corner of either one of them," he declared. He said that it had not been definitely decided what influence, if any, the sun spots had on weather changes.

### Price A Licensed Physician

The Prince of Wales became licensed to practice medicine, midwifery and surgery when he was invested at York House with the unique distinction of an honorary diploma of the Ancient and Honorable Society of Apothecaries. He is the only honorary member.

### Why He Succeeded

From hard work on a farm to the study of medicine in Cincinnati, where he was graduated in 1862, was the course which Dr. R. V. Pierce took.

In his younger days he practiced medicine over a large district. It was not until he had been in the army for some time that he determined to put up some of his remedies in ready-to-use form in order to reach a larger number of families.

He then came to Buffalo, N. Y., and here he put up Dr. Pierce's Great Medical Discovery for the blood as well as the favorite Prescription for women, carefully preparing them from roots, herbs and minerals placed them with drugs everywhere.

During the last sixty years Dr. Pierce's Discovery, for the blood, has been sold in larger quantities by druggists than any other medicine. It is a tonic in its effects and an alterative in its action on the blood, and it is a blood purifier.

It increases the appetite, regulates the digestion, cleanses the blood, and makes both men and women feel better. It was young and cure free. Ask your druggist for it.

An Essex couple recently made their two home, the bridegroom went to the funeral.

### Greeted the Canadians

Death of Flemish Burgomaster is Reported From Mons

Major-General Sir Frederick Loomis, K.C.B., who commanded the Third Canadian Division during the later months of the war, is in receipt of a communication from the Mayor of Mons informing him of the death in the Flemish city of Burgomaster Lescarts.

It was Burgomaster Lescarts who welcomed the Canadian troops into Mons on November 11, 1918. The deceased dignitary died on November 11.

### The Best Medicine

She Ever Took

So Says Miss I. Charbonneau of

Dodd's Kidney Pills

Ontario Lady is Very Enthusiastic and Gives Her Views About Dodd's Kidney Pills.

Ottawa, Ont.—(Special).—"I was feeling very bad all over," says Miss I. Charbonneau, who lives at 304 Will-Brook Street.

"My head and back ached, my legs felt as though they were made of lead and my sight was bad. I felt tired all the time. A friend of mine who had used your Dodd's Kidney Pills told me to try them. I took three boxes and they have made a new person of me. I feel better after taking the first box and have been perfectly well ever since. Dodd's Kidney Pills are certainly the best medicine I ever took and I highly recommend them to anyone suffering with their kidneys."

"It is noticeable that people who have used Dodd's Kidney Pills are enthusiastic in recommending them to others. I have seen many of your Dodd's Kidney Pills have built up and maintained their world-wide reputation."

New Regina Hotel

It is understood that an hotel of 110 rooms, costing approximately \$250,000, is to be built on Rennie street.

The structure, which is to be of reinforced concrete and brick, will be built by the owner of the site, Geo. Broder.

**Children Cry for**

**Fletcher's CASTORIA**

MOTHERS—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrup, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of **Dr. J. C. Fletcher** on the wrapper. Proven directions on each package. Physicians everywhere recommend it.

W. N. U. 1611

## WANT LOWER FREIGHT RATES ON ALBERTA COAL

Toronto.—Following a half-hour conference on ways and means of securing adequate coal supplies from Alberta for Ontario, Premier Howard Ferguson gave H. J. Brownlee, premier of Alberta, the assurance that as soon as the Alberta government was able to secure from the Dominion Government an order-in-council which will permit a special reference of Alberta coal rates to the Dominion railway board the Ontario government will co-operate with Alberta in joint representation of the case. Premier Brownlee held a number of conferences in connection with the movement of coal from Alberta, to Ontario. The conference was attended by the coal commission for Ontario, which includes representatives of the United Farmers of Ontario, Toronto Board of Trade, Canadian Manufacturers' Association and other associations. At this conference Mr. Brownlee was informed that if something could be done to bring Alberta coal to Ontario at a price to compete with the coal from the United States, there could be no doubt as to the heavy reception it would receive from the general public and large industrial buyers.

The only stumbling block to success of the scheme was cost of transportation, it was stated.

## Advocates Censorship On Wheat Reports

Would Have Stabbing Effect Says Brandon Agriculturist

Winnipeg.—A national censorship on wheat reports from irresponsible sources, before the official reports were made public, was advocated by A. E. MacKenzie, a prominent agriculturalist from Brandon.

Mr. MacKenzie referred to the frequent dissemination of wheat prices through unofficial reports and said a censorship such as he advocated would have a stabilizing effect on prices.

He thought that if the governments at Ottawa and Washington got together to establish such a censorship it would mean "stiff" wheat prices through the world which would be regulated somewhat by the actual condition of the crop.

## Buys Seventy-Six License

Toronto Firm Has Had Experience In Auctioneering Business

Toronto.—Charles M. Henderson, dean of auctioneers, established a record when at the police department he took out the seventy-six license for the Henderson firm. Mr. Henderson's father, Andrew, took out the first license in Toronto 76 years ago. The 1926 license granted Mr. Henderson marked a forty-sixth year for his family in the auctioneering business for the license for the business.

## Agricultural Credits

Winnipeg.—Extension of the co-operative movement into the field of agricultural credits was suggested as a means of affording adequate and cheaper short term borrowing facilities to the farmer by Prof. C. R. Poy, of the economics department of the University of Toronto, addressing the Manitoba Rural Credits Society's conference here.

## Says Gaelic Language Dying

Lublin.—James de Vera, in a speech at Rathmahon, a Dublin suburb, said the Gaelic language was rapidly dying, notwithstanding attempts to save it. He complained of the attacks being made against its preservation, saying they were being directed to ruin Irish nationality.

## First Direct Shipment

Halifax.—The first direct rail shipment of grain to pass through the new Halifax elevator was loaded on the Canadian Government Merchant Marine steamer Canadian Prospector. The Prospector, took 260,000 bushels and sailed for the United Kingdom.

## Becomes Professional Singer

New York.—Anna Turkey, once a candy seller at the Metropolitan opera house, made her debut as a professional singer, when she sang several songs in U. S. companies.

## Jap Found Dead In Boat

Victoria.—K. Imoto, Japanese, was found dead in a drift boat in the harbor, on the west coast of Vancouver Island. A wound in the stomach indicated accidental shooting, but no gun was found.

## Telegraphers Vote

### For Canadian Union

Secession From American Union Favored by Postal Workers' Winnipeg

Winnipeg.—Canadian National Commercial Telegraphers at Saskatoon, Calgary, Edmonton, Vancouver, Victoria and all other points west of Winnipeg, have voted to secede from the Commercial Telegraphers' Union of America, and join the newly-formed Electrical Workers of Canada. Mr. Mark, chairman of the Pacific district, has announced.

"The secessionist movement," Mr. Mark said, "has been brought about not by activities of people with Communist tendencies as President Tom Moore of the Trades and Labor Congress stated, but through the Canadian workers voting up to the fact that they are sending tens of thousands of dollars in per capita money to the United States every year and receiving nothing in return."

## For Research Work

Ontario Medical Man Awarded Grant To Carry On Investigation

London, Ont.—A. A. James, of the staff of Western University, in this city, has been awarded a grant of \$1,000 by the advisory council for scientific and industrial research in connection with the discovery of liver extract remedy for blood pressure. Dr. James has been engaged in this line of research together with Dr. Laughton, also of the Western University. Rival claims for credit for the discovery of this remedy put forth by Dr. W. C. Macdonald, of St. Catharines, Ont., and Doctors James and Laughton, of the Western University, have recently engaged the attention of the Canadian Academy of Medicine and other medical and university bodies.

## Blue Sky Legislation

Saskatchewan Government to Press For Dominion Enactment

Regina, Sask.—A. A. James, of the staff of Western University, in this city, has been awarded a grant of \$1,000 by the advisory council for scientific and industrial research in connection with the discovery of liver extract remedy for blood pressure. Dr. James has been engaged in this line of research together with Dr. Laughton, also of the Western University. Rival claims for credit for the discovery of this remedy put forth by Dr. W. C. Macdonald, of St. Catharines, Ont., and Doctors James and Laughton, of the Western University, have recently engaged the attention of the Canadian Academy of Medicine and other medical and university bodies.

For once the motion which is regarded as something of a hardy annual did not get by without some opposition. W. E. Knowles, K.C., of Regina, moved, James J. Brownlee, M.P., of Regina, seconded. The motion was carried by a majority of 10 to 5.

## Tax On Gasoline

Gas Tax Fund May Go To Aid Roads In Manitoba

Winnipeg.—Revenue from the provincial tax on gasoline and automobile licenses may be earmarked exclusively for construction and maintenance of roads, according to a communication from Premier James Brownlee, addressed to the Manitoba Motor League. Such a move would provide approximately \$500,000 for road construction throughout the province and would have the responsibility of financing and control of trunk highways upon the Provincial Government.

## Appeal In Wheat Pool Case

A decision of appeal against the judgment recently given by Mr. Justice Kirby dismissing the action brought by the Saskatchewan Wheat Pool against Loom R. Zarowski, Southey, for breach of contract, was lodged in the Saskatchewan Court of Appeal by R. H. Milliken, Saskatoon. The appeal will be heard at the March sittings of the court.

## Invited to Conference

Ottawa.—Industry and commerce as they affect war to be studied at an international conference in Geneva this year, and Dr. Adam Smith, Canadian economist, has been invited to participate in the preparatory committee meetings in March which will decide on a agenda.

## Bootleggers Take Profit

Winnipeg.—Bootleggers have made such inroads into the profits of the Manitoba liquor control commission that the council of the League of Nations to participate in the preparatory committee meetings in March which will decide on a agenda.

## U.S. Farmers Have Problems

Chicago.—Sam S. Thompson, president of the American Farm Bureau Federation, in a statement issued from this office, pleaded with the people of the United States to give thought to the problem of handling the farmers' exportable surplus.

## To Preserve Order

Government of Nova Scotia Takes a Hand in Disorders in Mining District

Sydney.—The following is part of a statement issued by Hon. J. C. Douglas, attorney-general of Nova Scotia, following his arrival at Glace Bay: "The Government of Nova Scotia is determined to do two things in connection with the unfortunate conditions existing in the coal mine areas of this province. "First, it will see that no one goes hungry and that relief will be provided the people through municipal sources, the government being prepared to support to the fullest the action of the municipality in that connection.

"Second, the Government of Nova Scotia is firm and resolute in its determination to see that the law is enforced in these mining districts. "The parties who have been guilty of lawlessness in this district during the last few days will be arrested and brought to justice.

## WHEAT POOLS OF TWO CONTINENTS MAY MEET SOON

Washington.—An announcement of the National Council of Co-operatives here says plans for a conference in February of all the wheat pools of the United States as well as those of Canada and Australia, are expected to result in immediate action. The conference is to be held during the period of the fourth annual conference of the National Council of Farmers' Co-operative Marketing Associations.

Advices received here from H. J. Farmer, of the Canadian Co-operative Wheat Producers Limited, are to the effect that the Canadian connection has received word from every wheat association in the United States that it will be represented at the wheat conference, and tentative arrangements have been made to hold this conference at St. Paul, Minn., February 16.

Officials of the Canadian wheat pools are in communication with officials of the Australian pools and representatives.

While the programme of the wheat conference has not been outlined, it is expected to deal largely with the coordination of activities of the various pools.

Among the addresses around which most interest is expected to revolve at the co-operative marketing conference here, is that of Hon. J. E. Brownlee, premier of Alberta, who will be his subject, "What the Canadian Wheat Pool Means to Us."

## Fanatics Beat French Priest

Said Scourging Necessary to Expel 'Spirit of Evil'

Bombon, France.—Abbe Desnoyers, the parish priest, is suffering intensely from the scourging he received at the hands of members of the fanatical "Order of Our Lady of Tears," while he lay stricken and gagged in the sacristy of his church. The priest himself is declared to be a member of the sect and the scourging is said to have been carried out in order to expel from his body the "spirit of evil" which possessed him.

## Floods In Belgium

Brussels.—Belgium now is confronted with the task of restoring her devastated regions, scorched this time not by war but by floods. It is estimated that the destructive waters have caused nearly as much ruin as fire and sword did in 1914. The damage is sure to mount into the hundreds of millions of francs.

## Invents Grain Stocker

Winnipeg.—Patents have been granted to Joshua K. Lambert, a pioneer farmer of the Regina district in Saskatchewan, for a grain stocker which is reported to have proved successful under existing tests. It is proposed to establish a factory in Winnipeg for the manufacture of the new machine.

## First Of Season

Winnipeg.—Winnipeg's first automobile tourist of the 1926 season arrived Jan. 5 in the person of John Rudy, of Fargo, N.D. Owing to the warm spell which has prevailed for over a week, roads in the province are in excellent condition.

## FRANCE SUFFERS HEAVY LOSSES THROUGH FLOODS

Paris.—Persistent rains are swelling some of the rivers and delaying the fall in those which had reached the flood peak.

During the last week of December the rainfall in France exceeded all records the normal. In Paris, during the last four days of January, there fell an average supply of rain for fifteen days.

Consequently, the outlook of the flood sufferers is gloomy. The Seine and its tributaries continued their upward march.

Many of the Paris suburbs have now been invaded by flood waters. In the provinces, with few exceptions, the situation is not so gloomy, and there are not going down, they have stopped going up.

In Belgium there is a general improvement. The situation, however, still is critical.

The Belgian national subscriptions for the relief of the flood victims has reached 5,000,000 francs (\$25,000), and additional funds are pouring in from all parts of the country. Early next week the Belgian chamber will take its first action on a measure providing credits for urgent rehabilitation work in the devastated regions.

Requests for aid have been extended for several years, and is expected to cost around 120,000,000 francs.

## Colonize Wrangel Island

Soviet to Send Ten Families of Eskimos For This Purpose

Vladivostok.—Wrangel Island off the coast of Siberia coast which for a century has been claimed alternatively by the United States, Canada, Britain and Russia, will soon be colonized by the Soviet Government.

The first eastern revolutionary committee in conjunction with a stock company has undertaken to send ten families of Eskimos and inhabitants of the chukotka district to the barren island to form the nucleus of the future population.

The settlers will be supplied with food sufficient for three years, rifles and ammunition for four years, and the necessary dogs and fishing and hunting equipment.

The government also will erect a wireless station on the island capable of communication with Canada, the United States and Russia.

## New Branch Line

Winnipeg Is Now Connected By Rail With Fort Alexander

Winnipeg.—The first train ran over the new Canadian National branch line from Winnipeg to Fort Alexander on Tuesday. Fort Alexander is the site of extensive developments in connection with the establishment of a new pulp and paper mill. Regular passenger traffic over the new line will begin January 20.

It is expected that a few town with a population of four thousand will be established at the mill site, and in addition railway officials expect other traffic will originate along the line through the drainage of the land, which is up to now been too wet for profitable agricultural work.

## Earthquake Shock In Germany

London.—An earthquake shock, Jan. 6, caused many people living along the Rhine to awaken from sleep and rush out of their houses to open spaces, says Exchange Telegraph dispatch from Cologne.

The shock was felt generally throughout Western Germany and even in Hamburg. No damage was reported.

## No Aid For Childless Families

Winnipeg.—Cupid has been unusually active among the bachelor unemployed of Winnipeg since the authorities announced no relief would be given to single men. With the added responsibilities of a wife, a number of jobless men experienced a rude shock when informed that no aid would be given to childless families.

## Work Well Together

Eastbourne, Eng.—Mr. and Mrs. James Sturges were a railroad wreck five years ago, each losing an arm. Today they are constantly together working as one person, she with her left hand and his with his right, in cutting their food they also use both hands.

## Interested In Horsemanship

London.—The Institute of the Horse has been founded in London to revive interest in horsemanship and riding. The founders admit the automobile is the bane of the road, but they want to put the horse back on the throne as king of the bridge path.

## Prince Stays Home This Year

Announcement of Engagement to Swedish Princess Expected

London.—Plans for the Prince of Wales to make another foreign tour during 1926 have been abandoned, it is announced. The Prince probably will not leave the British Isles during this year.

This was taken by many today as confirmation of the reports that the engagement of the heir to the throne, and possibly his marriage to Princess Adolf of Sweden, will be accomplished within this time.

It was reported some time ago that the "Empire's Ambassador," as he was called following his tour of South America, might go to Sweden, but evidently this project also has been abandoned.

Dame Rumer for several years has been picking brides for the unmarried daughters of the royal household, and with some firmness, in the name of the Swedish Princess, who is said to have won the hearts of the British royal family.

## All Countries Enter Contest

Committee Resolves Thousands of Poems For Official Hymn

Chicago.—More than 3,000 poems from every state of the Union, Canada, Ireland and Continental Europe have been received by the music committee of the eucharistic congress in the competition for the official hymn for the world gathering of Roman Catholics here June 20-21.

So great has been the response to the request that a hymn that a book of 100 of those deemed best will be published, in addition to the first choice.

These books will be sent to countries which subscribed poems.

The committee of music to accompany the hymns selected will be made after the best poems are chosen.

## League Official Injured

Director of Disarmament Section Hurt In Auto Accident

Geneva.—Salvador Madariaga, of Spain, director of the disarmament section of the League of Nations, was seriously injured in an automobile accident at Annecy, France, about 20 miles south of Geneva. His chest was broken, it is believed, and that he is out of danger and that he will be able, before long, to carry on his disarmament work. He recently was named to the position of secretary at future disarmament sessions.

Mrs. Madariaga had two ribs broken. Their automobile was sideswiped by a motor car.

## Retreat Of Soviet Troops Demanded

Alghan Government Also Insists On Release of Prisoners

Tehran.—According to the Afghan legislation, the Soviet frontier guard still is in Afghan territory after an attack on Afghan border guards. One junior officer was killed. Five Afghan soldiers were poisoned. The Afghan Government, in a note to the Soviet minister at Kabul, demands the immediate retreat of the Soviet troops from the occupied territory, the release of prisoners and the payment of damages.

## PLAN NATIONAL CONVENTION OF PROGRESSIVES

Regina.—A national convention of Progressives in the near future to decide national policies was agreed to at a meeting of Saskatchewan members of the party in session here, and the provincial executive was authorized to co-operate with Progressive organizations in other provinces and with the Federal Progressive members to bring the meeting about.

The provincial executive will meet in Saskatoon, during the Saskatchewan Grain Growers' Association convention, at the end of January, when details of the proposed national meet will be discussed.

Recent news also passed favoring the appointment of an provincial organizer, and providing for the organization of Progressive service clubs, along the lines of Kiwanis and Rotary, in urban, business and rural districts, wherever feasible.

The clubs will provide recreation and intellectual entertainment, with a view to placing before the public Progressive policies and of outlining the work of the Progressive party in parliament. The purpose is to create a permanently active body and sustain interest in Progressive ideals the year round.

## SAY THAT U. S. RUBBER PROBE IS PROPAGANDA

Washington.—Continuing with its investigation of the British control of the crude rubber supply and other foreign monopolies, the house commerce committee received testimony from a number of representatives of the United States rubber industry.

Meanwhile in the house the advisability of investigation was questioned by several Democratic members, Representatives Black, New York, and Connelly, of Texas, both asserting that the committee should limit its action to monopolies in this country over which congress has legislative powers.

Secretary Hoover's position in urging the rubber inquiry amounted to "Propaganda plus." In the opinion of Mr. Black, who charged that the United States tire companies were "stealing the faithful" Hoover on the British lion just when they are about to invade prices.

Mr. Connelly advised the committee to take a look at the trusts that are running behind its legs, and not spend all its energies attacking foreign monopolies.

Representative Celler, also of New York, asserted that Mr. Hoover "has ranted and railed against the British and yet has encouraged monopolies in this country."

F. A. Stebbins, president of the Glebe Rubber Co., of Akron, Ohio, told the committee that Britain could "squeeze us to death overnight" if it desired to press the advantage of its control over crude rubber.

## Old Country Colony For Northern Alberta

Overseas Settlement Committee and C.P.R. Enter Into Contract

Montreal.—The first direct contract to be entered into between the Canadian Pacific Railway and overseas settlement committee of the Imperial Agricultural Bank has been effected, the fruits of which will be the creation of an Old Country colony in Northern Alberta to be known as the "Clan Donachie" colony.

The settlement to the contract is the Scottish Immigrant Aid Society, which will acquire the immigrants and arrange for their settlement. They will be moved and settled.

Settlement will commence in the spring on prepared farms with 40 immigrant families to be placed in the country to be settled during the following months by 60 additional families, until the complete colony of 100 families is satisfactorily established.

## Lloyd George Not Forming New Bloc

Land and Nations League Issue Statement Denying Idea

London.—The British Nations League, of which David Lloyd George is president, has issued a statement denying the idea that he intends to form some sort of a centre party in the House of Commons. The statement says his whole heart is concentrated in getting a new land policy accepted by the Liberal party throughout the country. A great Liberal convention is to be held in the country for this purpose, according to the statement.

## Saskatchewan Creameries

Annual Meeting to Be Held in Regina

Regina.—The annual meeting of the Saskatchewan Co-operative Creameries, Limited, will be held in Regina, Friday, February 5, immediately following the annual convention of the Saskatchewan Dairy Producers' Association. It was decided at a meeting of the directors.

The managers of country plants will hold their annual convention in Regina, Tuesday, February 3, and will attend the provincial dairy convention.

## Gave Himself First Aid

Port Arthur, Ont.—Working alone in the woods, Earl Killins fell on a tree and gave himself a severe cut. With no way of getting immediate medical attention, Killins dressed the wound himself and put in two stitches. His foot, however, was unmanageable, and he is now in hospital here.

## Find Valuable Painting

New York.—A picture long considered a fake production and sold for \$10 the picture two months ago for \$10 was pronounced by Dr. O. Frank Muller a product of the studio of Rubens and partly executed by Rubens himself.

## THE JOURNAL

Transient advertisements to be paid for when ordered.

Display advertising rates on application at the office.

THURSDAY, JANUARY 14, 1926

## A MESSAGE

## OF THRIFT

The eternal question confronting the average person is whether to forego some of the essentials and luxuries of life for the solemn duty of saving, or to live on and spend on for the richness that material forces can provide. In the one case the certainty of accumulation is mathematical; in the other, there is a disparity between investing for those things that lead to a richer life in cultural attainments and reaping the harvest that follows prodigality.

There is no well established rule for the guidance of all people in matters of thrift. Benjamin Franklin gave us many good lessons, but lived in a different age. He had not the temptations to spend, his dollar, once let loose, would go much further than ours. He was temperate and had great balance of mind. What Franklin would do, were he living in 1926 with all the things to spend for, no one knows. Likely he would show even greater wisdom in frugality due to greater efficiency open to the man with the will to spend wisely.

There is a time to save and a time to spend; a first requisite is the fitness in selecting the right attitude toward money and its relation to our needs and wants. There are probably more millionaires than misers, and there certainly are more paupers than millionaires. Neither of these stations in life prove any rule, for there are too many intervening circumstances that control the respective situations. The best rule of thrift is to weigh every transaction on the strength of one's ability, with the soundness of business judgment, and in the light of common virtue.

## WHAT ARE WE SELLING?

What do we sell when we engage in a business transaction? Mere goods and service or only both? Are we selling honesty, cheerfulness, gratitude and kindness, as well as sugar, real estate, hats and gasoline? Boys and girls unconsciously and unconsciously learn lessons from their elders. When dealing with youth, special caution should be exercised to deal fairly. One shady deal may set a boy on the road to licentiousness and failure; one unkind word may set a-lingling a distrustful strain in the mind of a young girl that will grow to unthoughtful enormities in later life.

There are many stores that advertise themselves as institutions that cater to the young people and as places where boys and girls will be accorded the same treatment as grown-ups. If the managements

of these stores carry out this principle they are contributing in no small measure to the welfare of their communities and to the well-being of future citizenship.

## SCIENCE AND THE RACE

Science tells us that television is the next practical step in radio. In other words, we will see as well as hear at long distance and without limit. Along with this comes advancement in methods of transportation. Here is a practical condition. If we may sit at home and see, hear, talk with and comprehend all that is going on in the world, what need will there be to use the airship, or, in fact, to travel anywhere? Speculation in these matters is, of course, futile, since there have been few, if any, scientific discoveries or inventions to which members of the human race have not adjusted themselves.

An optimist is a fellow that turns a cloud wrong side out.

Too many people, while their shoulder is at the wheel, keep their hand on their pocketbook.

The same fellow who says he would die for his country, complains if he has to use a little time and elbow grease for his community.

You can't have your cake and eat it, and you can't have your town and elect it.

There's hope for the world. When Ford finally develops his airplanes maybe we can all go up in high.

Noted scientist of India says plants have hearts, which is more than some people seem to have.

Anyhow the fellow that has only a crystal set and head-phones won't have long ears long.

It was a barber who started that saying about two heads being better than one.

What this country needs is more adjectives to denounce the jingoists.

Uniform marriage-laws, that's the stuff! Girls, don't marry any man unless he is willing to don the uniform.

The chances are the same fellow who is accused of "trying to run things in this town" is kicking himself for giving so much time to his community to the detriment of his personal affairs.

To bring the Arctic within the scope of tourist traffic is the object of the Marquis M. N. degli Abissi, winter sports director at Lake Placid, who is organizing pack horse trips of thirty days' duration next year from the Canadian Pacific Pickles as far north as the Columbia Ice Fields within the Arctic Circle. "We are going to soften our feet a good deal" across the Sashihov. Over and camp near the sources of the Athabasca which empties into Great Slave Lake and thence into the Arctic. The Marquis asserts. The first of these trips is scheduled between June 28 and July 27 next year.

## HONORED FOR HELP IN DISASTER

Captain A. J. Halley, commander of the Canadian Pacific liner Empress of Australia, shown above, has been honored by the King of Spain in recognition of his humanitarian services following the Japanese earthquake in September, 1924. At the time of the disaster Captain Halley was in command of the Empress of Canada which reached Yokohama, two days after the earthquake, when the vessel was the means of carrying hundreds of survivors to safety ports.

Commander Halley has received a communication from the Secretary of State in Spain advising him that he is entitled to wear the Cross of the First-Class Civil Order of Desamocion, conferred by His Majesty King Alfonso XIII.

WORLD HAPPENINGS  
BRIEFLY TOLD

The Unlabeled grain market is hard hit following announcement of payment by the firm of Morse and Vancos. Bernard Morse, head of the firm, has disappeared.

Still active in public affairs, Sir John M. Gieson, former lieutenant-governor and an attorney-general of Ontario, celebrated his 84th birthday on New Year's Day.

Dr. W. Maloney, member of the Australian House of Representatives, has presented nine medals with gold medals to celebrate the birth of a seventh child to each mother.

The case of a man, 31 years of age, and a girl, 17, eloping to end their lives in a volcano crater is recorded at Tokyo. The man is survived by a wife and three children.

Canada's gold production for 1925 will be valued at over \$25,000,000, against \$21,522,443 for 1924. Estimated value of gold production for 1926 is nearly \$20,000,000.

To dance the Charleston for 18 minutes without stopping is the unique achievement of Margaret Coombs, pretty 18-year-old high school girl of St. Catherine.

With the coming into operation of the 14-hour week in trade unions throughout New South Wales, police men also are demanding a similar concession.

As an alternative, they will accept a substantial increase in salary. Dr. William F. Gye, the cancer research expert, has been awarded the annual fellowship established by London University for the graduate who has done the most in medical science in the past five years.

The prize is a stipend of about \$1,500. A new sort of criminal has made his appearance in Montreal, putting the city's famous bicyclist hand completely in the shade. He operates on a job and stealing pattern from the hands of women as he speeds past them down a hill.

King Ferdinand and Queen Marie of Roumania, as the parents of former King Prince Carol, will pay all the debts by contract prior to his renunciation of succession rights to the throne, but he will have to find the money to foot his own bills hereafter.

**Apprenticeship Plan in B.C.**  
Engineers Will be Undertrained Some As System is Great Britain

The industrial apprenticeship system, praised with success in the British Isles for many years, will be given a thorough tryout in the building trades of British Columbia.

The Vancouver board of trade and the trades and labor council have thrown their support behind the project and a committee of employers and contractors' representatives has been appointed to act as an apprenticeship council. The first work of the council will be the undertaking of a survey to secure the interest of employers in the apprenticeship principle and to ascertain the requirements of apprentices.

The apprenticeship plan has aroused much interest among the youth of the city and many inquiries have been made. It is expected to be an important benefit to contractors who, under present conditions, complain that it is difficult to encourage boys and young men to continue in the trade long enough to acquire skill.

The plan is expected to lead to a general stimulation of industrial efficiency.

**Says Hoover's Statements Unwise**  
London Times Comments On His Criticism of Britain Regarding Rubber

The London Times, which previously had not commented critically on the rubber controversy, says:

"We regret that Secretary Hoover allowed himself to be drawn into a series of statements which can only be described as imprudent, unwise and calculated to cause ill-feeling among Americans imperfectly familiar with the facts. His allegations of profiteering are to what they amount to are quite unjustified."

"It is not a case for retribution, but for common sense. At the best, Mr. Hoover's statements cannot increase the world's production of rubber; at the worst, they may serve to check a worldwide movement for the amicable adjustment of economic difficulties between nations by mutual concession and agreement."

**Greece Abolishes All Decorations**  
All decorations, military or civil, have been abolished in Greece by order of the government. Greek citizens are not allowed to wear even Greek orders. Titles of foreign countries may be worn only after official permission has been given.

**Have Canadian Allies**  
The Dominion department of agriculture has been advised by Gen. J. C. Larkin from London that Her Majesty and the Prince of Wales each have accepted a box of Canadian apples.

**Many Lose Deposits**  
107 Candidates in Federal Election Contribute to Government Coffers

One hundred and seven candidates lost their deposits in the recent general election. As a result, Canada's expenses in conducting the election, estimated at slightly over \$2,000,000, will be decreased by \$214,000.

According to available records, twenty-eight Conservatives, twenty-three Liberals, fourteen Laborites, eleven Progressives and eleven Independent Liberals lost their deposits. The remainder is made up of two Farmer-Labor candidates, three Independent Conservatives, two Liberal Progressives, five Independents, one Independent Progressive, one Socialist and six who were officially nominated but who did not win the polls.

Twenty of the four women candidates forfeit their deposits.

**Color of Truth Depends Upon Eyes Looking at It**  
A resolution protesting the proposal to merge the department of soldiers' civil re-establishment with the department of national defence was passed at the final sitting of the Dominion executive of the Dominion War Veterans' Association held at Ottawa. The D.V.C. largely deals with welfare work in connection with ex-servicemen of the Great War and was established for that purpose. The department of national defence has been with entirely military matters. It is urged. Lieut.-Col. McArthur, of Regina, Sask., presided over the final session of the executive.

**Alberta Sugar Industry**  
At least one farmer in the irrigated districts is glad he went into sugar beet raising. This is Wm. Valgard, near Taber, Alta., who secured \$24 return from three and one-half acres of land. The sugar factory at Raymond is having a splendid run and the new sugar is in much demand in the province.

## Canada in 1926

## Dominion is Now On the Crest of a Wave of Prosperity

Canada is entering upon a new year with possibly the best prospects she has ever had. For some reason or other, whether it has been of our own making or that nature has been particularly kind to us, says the natural resources intelligence service of the department of the interior, we have just passed through a year of good crops, our mining industry has been busy, our forest resources have been actively developed and our manufacturing plants have gradually increased production. In fact, the possibilities seem to be about all we could desire, and there is only one question to be answered, "Are we prepared to make the most of our opportunities?"

If we sit down and limit the range of our vision to our immediate vicinity we can easily see the bright outlook, while if we wish to be pessimists we can certainly find an excuse for being so, but we would have difficulty in finding a bona fide reason for any feeling of gloom. Canada's clouds, the result of post-war conditions, are rapidly clearing away, and from the silver lining is shining forth a brightness that bids fair to place Canada upon the crest of the wave of prosperity in the coming year.

**World Championship Dog Derby Planned**  
Will Exceed The Pae Derby By Twenty-three Miles

A world championship dog derby to be the "top of the world and back" will be run for the first time in the history of dog mushing at the Banff winter carnival this year. This course, from Calgary to the Great Divide and back, will be the longest dog race ever staged, according to records, and will exceed The Pae Derby by 23 miles.

The strongest trophy and \$1,000 in cash will go to the winner. From Calgary, the dog team will travel to a height of 5,200 feet over a distance of 123 miles. The contestants will then return to Banff via Lake Louise, completing the course of 173 miles. The course lies over the most rugged scenery in North America and will be the most unique ever travelled by a dog team.

Another feature of the carnival which will be staged from February 5 to 11 inclusive, will be the skijumping contest over the new and enlarged hill. Among those who will take part are the world champions in both the amateur and professional classes.

**Radio May Cure Deafness**  
Manitoba Government Considering the Installation of Receiving Apparatus in School for Deaf

Installation of radio receiving apparatus in the Manitoba School for the Deaf is under consideration by the Provincial Government. Such action would be a valuable proof that such would be beneficial, according to R. Fletcher, deputy minister of education.

The authorities, while inclined to hold out a pending expert opinion on the curative influence of radio, have been aroused by two bona fide cases of deafness which have resulted in the restoration of the auditory sense through the use of the radio. Many children, it is stated, have been brought to the school for the deaf have been listening in purely as an experiment, Thomas Rodwell, superintendent, declared.

Concentration of sound, he said, would make it possible for those who could not distinguish between sounds, but a nothing extraordinary had yet been obtained he did not think it right to raise false hopes in those afflicted.

**How To Order Patterns**  
Address: Winnipeg Newspaper Union, 125 McLaughlin Avenue, Phone No. 1000. Size.

**Designs New Cloth**  
New Fabric is Invented by a Noted London Designer

London and Paris shortly will see an entirely new fabric created by a noted London designer. Its exact composition has been kept a secret but it is known that the material is "pleated" from the quills and specially treated and woven are the basis of it.

The cloth is lighter than tulle and softer than the finest crepe de chine, and it displays a different pattern from every angle. Thousands of yards of the material are being made. So striking is the cloth that the manufacturers say they expect it to be all the rage in the West End ballrooms this winter.

**Veterans Pass Resolution**  
Merging of Department is Opposed by the G.W.V.A.

A resolution protesting the proposal to merge the department of soldiers' civil re-establishment with the department of national defence was passed at the final sitting of the Dominion executive of the Dominion War Veterans' Association held at Ottawa. The D.V.C. largely deals with welfare work in connection with ex-servicemen of the Great War and was established for that purpose. The department of national defence has been with entirely military matters. It is urged. Lieut.-Col. McArthur, of Regina, Sask., presided over the final session of the executive.

**Value Of 1925 Crop**  
An Average of \$2540 For Each Farm in the Prairie Provinces

According to figures just published by the Dominion bureau of statistics, field crops in 1925 will return to the farmers of Manitoba, Saskatchewan and Alberta the sum of \$45,688,000. Taking the number of occupied farms in these provinces in the last census, this would indicate that an amount in excess of \$2,500 went to each one of them from this source alone.

**Kept Awake For 100-Hour Period**  
Otto Ulbricht, former head gardener for George Smith in Albany, N.Y., collected a \$200 reward when he completed a 100-hour period without sleep. William Wales a friend, paid the bet. Ulbricht was watched by two men of Albany, working in twelve hour shifts. He rode on the subway, walked the streets, and ate huge meals during his vigil.

A man is never really old, comments a philosopher, so long as he can thrill to an old love song or a new idea.

You can't blame a splinter for hurting particularly; if it should be kept particularly it wouldn't be one.

**CLIPSE FASHIONS**  
Exclusive Patterns  
by J. J. J. J.

1053

Ripples Are Sponsored By Fashion Here is presented a silhouette in long bodice effect with ample lower flare, a conspicuous feature of the latest fashion. This model has convertible collar opening far enough down the front to allow it to be slipped on over the head, and fastens with a narrow tie of the crepe satin. Long full sleeves showing the border at the lower edge are joined to the shoulders and gathered into bands of satin at the wrists. No 1053 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 bust requires 4 1/2 yards 36 or 40-inch, or 3 1/2 yards 44-inch material. Price 20 cents.

## Cancer Not Infectious

## Leading U. S. Medical Views On This Dread Scourge

Three outstanding conclusions were announced by leading experts of medicine and genetics, during a symposium on cancer, conducted at Yale University by the American Society of Zoologists.

The conclusions were:

- (1) That cancer is not an infectious disease.
- (2) That cancer cannot be developed except by persons in whom there is a hereditary cancerous strain.
- (3) That even persons tainted at birth with a cancerous strain cannot develop the disease spontaneously, but only through the agency of environmental forces, chief among which is fractional irritation.

The first was expounded by Dr. James B. Murphy, of the Rockefeller Foundation for medical research. Dr. L. C. Strong, of the Biogen Institute, Harvard, supported Dr. Murphy in his finding, and added his convictions on heredity, which were disputed, however, by Dr. James Ewing, of Cornell.

Another announcement of significance was that of Dr. H. J. Baggis, of the Cornell Medical College, who reported that experiments with mice and study of the clinical history of 100 cancerous tumors indicated that the nursing of babies has little, if any, effect in producing cancer of the breast. Abstinence from nursing, on the contrary, he believed, had a protective effect in increasing cancerous susceptibility.

**Kaiser Preaches Sermon**  
On a Last Pence

Gave Discourse Christmas Morning

Gales did not interfere with the former German Emperor's Christmas festivities. They began in the great hall of the chateau in the morning with a sermon by William and his black skull cap protecting his head from draughts, discoursed on the Nativity and a just peace before an audience which included his wife, Princess Hermine, and her children.

The invited guests included members of the Dutch nobility, the chief of the Dutch gendarmes and the staff of the former Emperor's court. One of the guests later said that William delivered his sermon with the gestures of a dramatic actor.

At 5 o'clock in the evening, in the uniform of a Prussian general, William, accompanied by his wife, visited the quarters of the servants and the retainers and distributed gifts. Later in the great hall the couple sat on a sofa of Frederick the Great, and William directed the lighting of the Christmas trees and personally distributed gifts.

The former war lord cut his Christmas tree with his own axe. For several days he was busy distributing gifts, each including a signed photograph, to the poor families of the village. Some of them also received consignments of wood chopped by William on his estate.

**Starts Work On Large Tunnel**  
Princess Mary Set Drills Going With Gold Key

Work began on what will be the largest tunnel in the world, when Princess Mary, with a gold key, set the drills going at the site of the Liverpool-Birkenhead tunnel. It will be two miles long and fifty-four feet in diameter, accommodating four lines of traffic, will cost \$25,000,000, and 1,000,000 tons of rock and earth must be removed. The iron tubing will be surrounded by eight feet of concrete and also will be lined with concrete to prevent corrosion.

**Quebec Tourist Trade**  
Estimated Province Benefited To Extent of Twenty Million Dollars Last Year

During the tourist season of 1925, 250,000 automobiles entered the province of Quebec from the United States and other Canadian provinces. This estimate has been prepared by the Quebec Automobile Club which draws its information from official and semi-official sources. On the basis of four persons to a car, it would appear that one million persons came into the province of Quebec by automobile during the past season. Each of these is estimated to have spent at least twenty dollars. Quebec, therefore, benefitted to the extent of \$20,000,000.

**Study Of Cancer**  
Difference In Mortality In Various Countries Remains Unexplained

The reason for the pronounced differences between countries in mortality from cancer remains unexplained and may be attributed to a great variety of causes. This report has been made by the cancer commission of the League of Nations after an exhaustive inquiry into the subject. The commission declares, however, that the investigation has developed material for a more detailed comparison than has previously been possible on the incidence of mortality from cancer in terms of locality and nationality.

A homeing pigeon was the means of discovering the identity of a man found guilty of mortality from cancer in terms of locality and nationality.

A homing pigeon was the means of discovering the identity of a man found guilty of mortality from cancer in terms of locality and nationality.

## New Power For Engines

## Scientists Say Discovery of Dutch

The British patent office has issued a patent for running an engine on power developed from the atom. The inventor, a Dutchman, has found that if atomic gases containing titanium are heated to 1,700 degrees centigrade, the atoms will disintegrate, and an enormous amount of heat will be developed.

The sand is heated in a small electric furnace, and the heat which is produced in the breaking up of the atom is used to heat the water in a boiler, and this drives an engine or turbine.

It is too soon to say anything about the commercial practicability of the process, but our scientific experts assure us that if we can only harness the power which resides in the atom we can accomplish wonders, and can even snap our fingers at the cost of the scientific if, is, however, rather an important one, and while we hope for cheap power we are not too confident of securing it immediately.

**Quebec Tourist Trade**  
Estimated Province Benefited To Extent of Twenty Million Dollars Last Year

During the tourist season of 1925, 250,000 automobiles entered the province of Quebec from the United States and other Canadian provinces. This estimate has been prepared by the Quebec Automobile Club which draws its information from official and semi-official sources. On the basis of four persons to a car, it would appear that one million persons came into the province of Quebec by automobile during the past season. Each of these is estimated to have spent at least twenty dollars. Quebec, therefore, benefitted to the extent of \$20,000,000.

**Study Of Cancer**  
Difference In Mortality In Various Countries Remains Unexplained

The reason for the pronounced differences between countries in mortality from cancer remains unexplained and may be attributed to a great variety of causes. This report has been made by the cancer commission of the League of Nations after an exhaustive inquiry into the subject. The commission declares, however, that the investigation has developed material for a more detailed comparison than has previously been possible on the incidence of mortality from cancer in terms of locality and nationality.

## Here and There

The sea fish catch on high coast in Canada for the nine months ending September, 1925, was worth \$19,897,076, as compared with \$18,118,436 for the same period in 1924, an increase of \$1,783,640.

A gold medal has been awarded to the Canadian Pacific Railway for the company's exhibit at the Canadian National Exhibition this year. On one side of the medal is a portrait of the Hon. Howard Ferguson, Premier of Ontario, while on the other is a scene on the exhibition grounds.

E. W. Beatty, chairman of the Canadian Pacific Steamships, stated recently that more liners of the "M" type would be built to replace older liners, such as the Marloch, Marburn and Montreal. The new ships will be similar in all respects to the S.S. Montclair and Montrose. The Marloch, Marburn and Montreal will be sold.

A fish caught in Shuswap Lake, British Columbia, after a forty-minute fight turned out to be a monster rainbow speckled trout, weighing 17½ pounds, with a length of 36½ inches and a girth of 24½ inches. It was mounted and exhibited in the windows of the Dominion Express Company, Montreal, before being shipped to the owner in England.

Live stock exchanges are to be formed in Montreal to prevent the sharp decrease in the number of cattle. In the period 1920-1924, there was a reduction of 331,000 head of cattle in the province of Quebec. Because of the low prices for livestock, the Quebec farmer has refused to face the long period of feeding and tending, and kills the calves.

Involving the use of \$4 million tons of crushed rock, or about 70,000 carloads, approximately 1,000 miles along the Canadian Pacific Railway, Eastern Lines, have been ballasted with rock to date. Rock ballast is dustless and there is a very great increase in comfort for the passenger. Rock-ballasting also increases the strength of the track and otherwise improves its physical condition as to drainage and other matters.

The Canadian Pacific Railway has renewed the offer of three free scholarships to apprentices and other employees enrolled on the permanent staff of the company and under 21 years of age, and to minor sons of employees. The scholarships cover four years tuition in architecture, chemical, civil, mechanical or electrical engineering at McGill University and are subject to competitive examination.

Taking steps in the United States toward a greater recognition of clean sportsmanship and the need of conservation of fish, game and forest resources, Oark Ripley, of Tennessee, editor of Field and Stream, Outdoor Life, Outing, announced at Montreal recently that catching game fish worms had been banned in practically all states of the republic. Worm fishing is considered destructive as small fish returned to the water are too badly wounded to live.

Sugar beet production in Canada is increasing on a phenomenal scale while the value of refined beet sugar has increased about 100 per cent. In 1924, 13,111 acres were planted to sugar beets yielding 236,177 tons of beets, from which 86,770,709 pounds of sugar was refined with a value of \$9,192,545. In 1925 there was a yield of 169,200 tons of beets from 17,541 acres. The value of the 89,426,160 pounds of sugar refined was \$9,745,206.

## Here and There

William Valgardson, a farmer at Taber, Alberta, is glad he went into sugar beet raising. He secured a \$350 return from three and one-half acres of land.

Winter sport activities at old Quebec are in full swing. This is considered the most brilliant season of entertainment for years past. Hundreds of sport enthusiasts and tourists from the New England states, Canada, and other parts of the continent are turning up in force at the Ancient Capital.

Miss Isabel Courcier, only fifteen years of age, is the world's woman champion ski jumper. She created a world record at Revelstoke, B.C. at the age of sixteen in 1922. This winter, taking part in the winter sports at Quebec, Miss Courcier made a jump of 88 feet in the International-Intercollegiate Ski contest.

A report from Santha Falls, Ontario, is to the effect that a train was stopped in order to avoid a collision with an automobile making for the tracks over a crossing. The train was stationary when the automobile struck one of the cars. The occupants of the automobile escaped uninjured.

Tourists on the Canadian Pacific liner Empress of Scotland were at the famous King Solomon quarries beneath the walls of Jerusalem, Christmas night. Many of the according to cable received a C.P.R. head office, bought gravel made from the stone of the quaries, with olive wood handles.

According to information at the headquarters of the Canadian Pacific Railway, holiday passenger traffic this year from points west was the heaviest since 1920 in the past few weeks and represented a fifty per cent increase over the amount handled over Canadian Pacific Railway lines last year. Special arrangements made to take care of the Christmas and New Year rush worked efficiently.

Canadian Pacific Railway earnings for the month of November were \$19,294,184.37, an increase of \$1,193,229.12 over the same period for 1924. Net profits for November show an increase of \$218,153.80 over the month of November of 1924. Net profits for the eleven months ending November were \$16,327,983.83, an increase of \$1,830,043.32 over the corresponding period for 1924.

According to Johannes Berge, journalist, of Bergen, Norway, who is visiting the Dominion to record his impressions of Canada, silver fox farming has become a very important industry in parts of Norway. There are now about 150 silver fox farms in the Søndmøre district of Norway. Last autumn, about 120 silver foxes, estimated to be worth 1,800,000 kroner, were shipped from the island of Norway.

Traffic on the Great Lakes this season compares well with that of last year as far as Canadian Pacific earnings are concerned. Mc.Duff, manager of the Great Lakes Steamship Service explained recently that while grain tonnage fell below that of the 1924 season passenger traffic and package freight business was considerably better, making the total well up to the average.

A party of Mennonites, bound for western Canada, mostly to Manitoba, arrived in Montreal recently with the report that those of their sect who had gone to Rosario, Mexico, were far from satisfied and intended going north. It is understood that 1,000 Mennonites have emigrated to Canada within the last two months and that about 2,500 more would be coming in the near future. They are in charge of the party and are going to Mexico.

For the second time in the history of the newspaper industry, Canadian output has run ahead of that of the United States. During the month of May Canada produced 130,018 tons of newspaper, as compared with 129,000 tons in the United States. The cumulative production of Canadian mills for the first five months of the current year totals \$22,305, which favorably compares with a production of \$22,024 in the United States during the same period.

James Oliver Curwood, the well-known American novelist, who crossed not long ago to Europe on the "Empress of France" and returned a few weeks later to Canada on the "Empress of Scotland," wirelessly the following message from the "Scottland" to the Canadian Pacific headquarters in Montreal: "Can never fully express my appreciation of the splendid treatment accorded me by Captain Gillies and Captain Griffiths, and the staffs aboard the 'Empress of France' and the 'Empress of Scotland.'"

A party of British journalists is now touring Canada at the invitation of President E. W. Beatty, of the Canadian Pacific Railway, for the purpose of gaining first hand knowledge of economic and industrial conditions in this country. They are John A. Buis, Glasgow Herald; C. J. Jory, London Daily Telegraph; R. P. Peterson, London Times; E. Read, South Wales Daily News, Cardiff; Captain E. Altham, London Morning Post; Hugh Martin, London Daily News; R. A. Colwell, Western Morning News, Plymouth; W. A. Fenton, Daily Chronicle, London; J. F. Charter, Westminster Gazette, London; John Sayers, Belfast Telegraph.

Exceeding anything before shown in the Dominion of Canada and in the world, figures of marketing of all grains and of car loadings in the month of November furnish a double record for Canadian Pacific Railway western lines, for Canada and for the world. Marketing of all grains totalled 69,216,782 bushels and car loadings were 39,523 cars. For figures even distantly approaching the above, the statistician must go back to November 1923, when 67,008,000 bushels of all grains were marketed and 36,875 cars were loaded.

## Lote Pen Still Gaining

The 10th week of the egg-laying contest shows F. Lote's pen leading by 70 eggs, thus making a slight gain over the Lethbridge pen from last week:—

| Name               | Week | Total |
|--------------------|------|-------|
| Mrs J. W. Cookson  | 25   | 198   |
| Lily White P.F.    | 83   | 225   |
| E. R. Nicholls     | 46   | 320   |

## Tone and Thought

(Continued on Page 1)

Bearing this in mind, it may be imagined and even deduced that, should we endeavour to train our thoughts to such a degree of control that we are enabled to think Quality and Quantity of Tone we must inevitably produce these relative of Tone

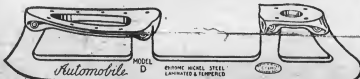

Some performers have a glorious natural tone, even in the undeveloped stage of a musical career. This is the result of an inborn, perhaps hereditary trait, not necessary given by mother or father, but which may have descended through a number of generations, to burst into flame in a new prodigy—a great genius.

To possess a wonderful natural tone does not mean that no hard work is necessary on the part of its possessor. Tone has to be graded; it has to be woven into technique, beautiful phrasing, and the many attributes which collectively find their places in the consciousness of greatness. This means hard, concentrated and thoughtful study.

Budding performers without this natural gift of Tone have no need to be wholly or even partly disheartened, seeing that the Almighty has given us all the power of applying concentrated thought in a more or less degree. It means greater effort and perseverance on such a pupils part; but even this is an advantage, giving, as it does, an increased power of concentration, a quality to be desired in all branches of one's training.

(To Be Continued.)

## C. C. M. SKATES

|               |        |                |        |
